SCIENTIFIC PORTFOLIO

AKONASSOU SEDJRO TCHÉDRAC SINGBO

Laboratory Technician | Health Actions Inspector in Biomedical Analysis

CURRENT POSITION

Since July 2026 · CHU de la Mère et de l'Enfant (CHU-MEL), Cotonou, Benin

Professional profile

Medical biotechnology graduate with hospital laboratory experience across haematology, clinical biochemistry, serology/immunology, microbiology and parasitology. Practice includes quality control, technical validation of results, biosafety and laboratory data management.

Research direction

Undergraduate thesis: statistical evaluation of inflammatory biomarkers in prostatic dysfunction, covering 81 patients at CHUD Ouémé-Plateau and CRP, PSA, leucocytes and cytokines. Thesis mark: 17.67/20.

Education highlights

Bachelor's degree in Medical Biotechnology, ENSBBA–UNSTIM, 2021–2024, awarded with Honours. Final average: 15.87/20.

Location: Cotonou, Benin | French: native | English: B2

Professional contact: akonassousedjrotchedracs@gmail.com

Professional experience and skills

Experience

PERIOD	ROLE AND SCOPE
Since Jul 2026	Health Actions Inspector in Biomedical Analysis · CHU-MEL, Cotonou. Medical laboratory analyses across haematology, clinical biochemistry, serology/immunology, microbiology and parasitology; quality control, technical validation, biosafety and laboratory data management.
Jun–Sep 2025	Medical Laboratory Technician Intern · CHUD Ouémé-Plateau, Porto-Novo. Sample reception and processing; bacteriology, haematology, biochemistry, serology and parasitology; support for quality control and technical validation.
Mar–Jun 2024	Research Intern · undergraduate thesis · CHUD Ouémé-Plateau. Protocol design, biomarker assays (CRP, PSA, leucocytes, cytokines), statistical processing, writing and thesis defense.
Jul–Aug 2023	Academic Intern · Centre de Santé d'Adjarra. Patient reception, support for specimen collection, routine medical biology analyses and record archiving.

Laboratory methods and digital skills

• Blood smears, ELISA, immunoturbidimetry, bacterial culture, Gram staining and antibiotic susceptibility testing.

• Medical biology: haematology, clinical biochemistry, serology/immunology, microbiology and parasitology.

• Python and SQL for data manipulation and analysis; advanced Excel and Power BI for reporting and visualization.

• Research protocol design, biostatistics, scientific writing, quality control and biosafety.

Education and language

Bachelor's degree in Medical Biotechnology, ENSBBA–UNSTIM, Dassa-Zoumé (2021–2024), Honours; final average 15.87/20. Baccalauréat, Series D, CEG Malanhoui (2021). French: native. English: B2 across assessed skills; certificate, TBC-AFRICA-USA, Cotonou (2024).

Project portfolio

Projects 01–04 are technical demonstrations using synthetic data. Project 05 is the undergraduate thesis described in the CV. The demonstrations are not CHU-MEL results or clinical evidence.

PROJECT	SCOPE AND PUBLISHED EVIDENCE	STATUS
01 · Antimicrobial resistance	100 synthetic observations across five organism–antibiotic pairs. Preserves S/I/R counts and makes denominators visible.	Synthetic demonstration · microbiology
02 · Bacterial sequence quality control	Three synthetic FASTA sequences; 191 bases total. Reports length, GC fraction, ambiguous bases and a simple exploratory ORF indicator.	Synthetic demonstration · bioinformatics
03 · SQL and ETL	12 synthetic observations, four isolate identifiers and two organisms. Publishes SQL summaries, a quality log and a provenance manifest. Source URL and retrieval date are unspecified.	Synthetic demonstration · data quality
04 · Biomedical statistical analysis	Six synthetic groups. Reports proportions and 95% Wilson intervals; for 1/2, the interval is approximately 9.45–90.55%.	Synthetic demonstration · biostatistics
05 · Inflammatory biomarkers in prostatic dysfunction	Undergraduate thesis at CHUD Ouémé-Plateau: study of 81 patients, covering CRP, PSA, leucocytes and cytokines. Thesis mark: 17.67/20.	Research thesis · CV summary

Professional development and responsible reporting

Leadership and community engagement

• Prefect of Youth, Ouémé Department, Government of Youth of Benin (since 2025).

• Technical Focal Point, Hygiene and Health Commission, World Social Forum 2026, Cotonou.

• ODL Facilitator, Africitizen ODL Facilitators Fellowship (since 2025).

• President of Specialized Institutions, FEUA (2022–2024).

Additional training and distinctions

• iSHEERO × DataCamp Scholar (2026): Python, SQL, data visualization and introduction to machine learning.

• Microsoft Data Analyst Certification: in progress.

• BIO101, Saylor.org: 85.19% (2026); CHEM101, Saylor.org: 91.84% (2026).

• Best Leader of the Year, ENSBBA (2023); Young Diplomats Conference participant (COJED, 2025).

Responsible interpretation

The numerical outputs in projects 01–04 come from synthetic demonstrations. They must not be described as hospital findings, patient results or prevalence estimates. Project 03's file hash identifies the input used but does not verify biological origin; its source URL and retrieval date are unspecified.

The thesis is described using the CV summary. The public page should keep patient identifiers and individual-level results out of the repository. Technical portfolio work is distinct from routine hospital duties.
